

Taste of the Wild®

CANYON RIVER FELINE RECIPE WITH TROUT & SMOKED SALMON A GRAIN-FREE DIET

The balanced diet that nature intended®

Modern science proves that domesticated cats share the DNA of ancient felines.

It's easy to see that they still share many of the same behaviors as well, like their craving for fish. Give your cat the proper nutrition it needs to thrive and feed it like the true carnivore it is, with Taste of the Wild.

SPRING-FED TROUT & SUSTAINABLY SOURCED SALMON – Trout, the number one ingredient in this formula, and smoked salmon provide highly digestible protein for a healthy body with the great fish taste cats crave.

SPECIES-SPECIFIC PROBIOTICS – Healthy digestive and immune systems are vital to the overall health of your pet. Our proprietary Viables® Probiotics are developed specifically for cats and added after the cooking process to ensure viability. Each pound of Taste of the Wild provides 80 million live, active cultures that help support healthy digestive and immune systems.

OMEGA FATTY ACID BLEND – Optimal levels of omega-6 and omega-3 fatty acids work together to promote healthy skin and a shiny coat.

TAURINE – This essential amino acid is beneficial for all cats and helps to maintain healthy heart and eyes.

ALL LIFE STAGES NUTRITION – Formulated to meet the nutritional needs of your cat throughout all stages of life, from kitten to senior cat.

ANTIOXIDANTS – Vegetables and fruits, including sweet potatoes, tomatoes, blueberries and raspberries, provide nutrients that help promote your cat's overall well-being while guaranteed levels of zinc, selenium and vitamin E help support the immune system.
