

Taste of the Wild®

PACIFIC STREAM

PUPPY RECIPE

**WITH SMOKED SALMON
A GRAIN-FREE DIET**

The balanced diet that nature intended®

Modern science proves that your dog shares the DNA of ancient canines, like the wolf. Years of domestication and excellent care have turned your dog from a fierce and wary hunter to a trusting best friend. Although their tastes demand something of the wild, their diet should provide them with all the nutrition they need to thrive.

And that is exactly what they get with Taste of the Wild.

SUSTAINABLY SOURCED SALMON – Salmon, the number one ingredient in this formula, provides high-quality protein and omega fatty acids for skin and coat health. To help promote sustainable fishing, we use a blend of wild-caught and farmed salmon.

SPECIES-SPECIFIC PROBIOTICS – Healthy digestive and immune systems are vital to the overall health of your pet. Our proprietary K9 Strain® Probiotics are developed specifically for dogs and added after the cooking process to ensure viability. Each pound of Taste of the Wild provides 80 million live, active cultures that help support healthy digestive and immune systems.

SMALL KIBBLE SIZE – Small kibble size is easy for small mouths to chew, while the crunchy texture helps keep teeth clean.

DHA – This omega-3 fatty acid, provided by salmon oil, helps support brain and vision development in puppies.

EGG-FREE – This formula is made without eggs or egg products, which may be suitable for dogs who have a sensitivity to eggs.

ANTIOXIDANTS – Vegetables, legumes and fruits, including sweet potatoes, peas, tomatoes, blueberries and raspberries, provide nutrients that help support your dog's overall well-being while guaranteed levels of zinc, selenium and vitamin E support the immune system.
